Business Reporting Analyst | Data Visualisation | Project Documentation

Summary

Analytical and organised business reporting professional with experience in developing performance reports, preparing Power BI visualisations, and converting complex project information into clear business insights. Skilled in data organisation, report documentation, dashboard design, and communicating findings to technical and non-technical audiences.

Experience

Business Reporting Analyst *Feb 2028 – Present*
Territory Performance Group, Darwin

- Produced weekly and monthly performance reports for operational and management teams
- Combined information from spreadsheets and business systems into structured reporting datasets
- Developed Power BI dashboards to monitor targets, service performance, and operational trends
- Created visual reports using bar charts, line graphs, KPI cards, tables, and interactive filters
- Investigated unusual results and communicated key findings to relevant team members
- Improved report templates to make business information easier to understand and compare

Project Reporting Assistant *Jun 2027 – Jan 2028*
Northern Data and Technology Services

- Collected project updates from team members and organised them into formal progress reports
- Prepared report sections covering project scope, milestones, risks, outcomes, and recommendations
- Used Microsoft Excel to organise, validate, and summarise project information
- Created supporting Power BI visuals to demonstrate project progress and performance
- Maintained document version control and ensured reports followed consistent formatting standards
- Assisted with presentation slides and explained project results using clear visual evidence

Skills

- Business performance reporting
- Microsoft Power BI dashboard development
- Data visualisation and dashboard layout
- Microsoft Excel and spreadsheet analysis
- Data validation and quality checking
- Report planning, structure, and formatting
