Information Technology Student | Report Writing | Data Analysis and Visualisation

Summary

Motivated Information Technology student developing practical skills in data analysis, Power BI, technical report writing, and project documentation. Interested in transforming project data into clear visualisations and professional reports. Quick to learn new technologies, reliable in team environments, and focused on producing accurate and well-structured work.

Experience

Report Writer – University Group Project

Aug 2026 – Present

Charles Darwin University

- Researched suitable tools for preparing technical reports and presenting project data
- Installed and configured Microsoft Power BI Desktop for project reporting activities
- Explored Power BI features, interface, data views, and visualisation tools
- Practised importing project data and creating basic charts and visualisations
- Reviewed sample technical reports to understand professional structure and formatting
- Maintained weekly activity records and documented individual project contributions

Data Reporting and Visualisation Project

2026

Personal Practice Project

- Organised sample business data using Microsoft Excel before importing it into Power BI
- Created basic charts to compare performance across different categories and periods
- Designed a simple report page using charts, cards, filters, and clear headings
- Analysed visual results to identify patterns, changes, and differences in the data
- Prepared written explanations summarising the information displayed in each visual
- Checked the final report for consistent formatting, accuracy, and logical presentation

Skills

- Microsoft Power BI Desktop
- Data importing, cleaning, and preparation
- Creating charts, dashboards, and data visualisations
- Data analysis and interpretation
- Technical report writing and documentation
- Professional report structure and formatting
- Presenting data findings clearly and effectively
- Microsoft Excel for data organisation and analysis
- Researching and selecting suitable reporting tools
- Team collaboration and project documentation
