

BPMN — Business Process Model and Notation

An ISO-standardised notation for business processes. Its used to visually represent a **business process from beginning to end** using standard symbols.

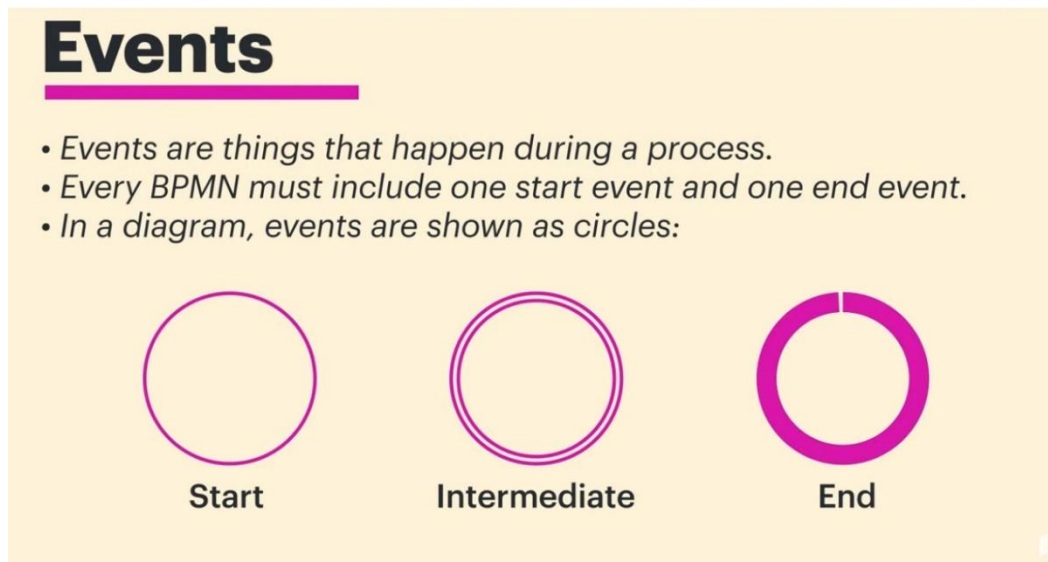

Figure 1 BPMN EVENTS

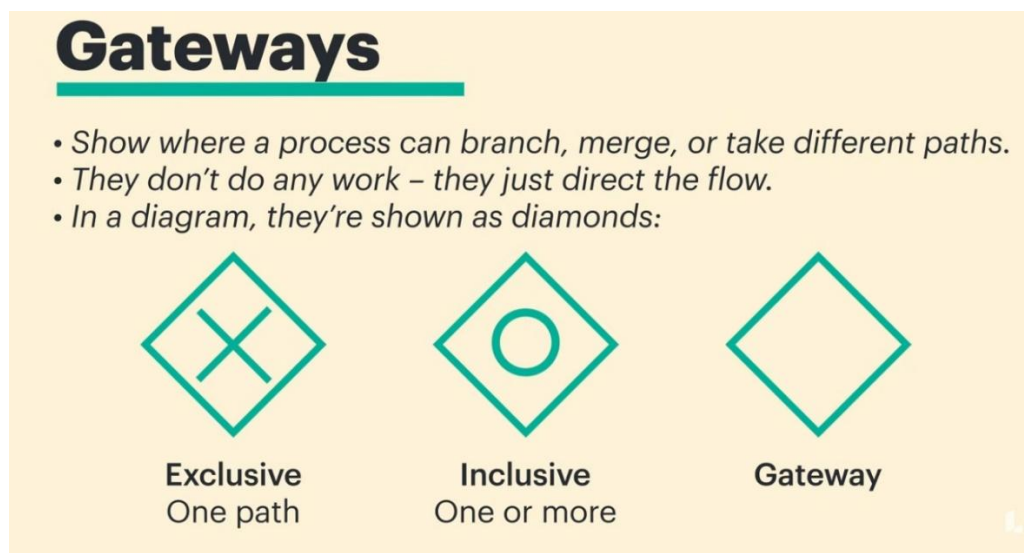

Figure 2 BPMN GATEWAYS

2 roles of Gateways:

1. Always show a merged or split flows.
2. Gateway symbol indicate how many paths may be taken.

Sequence Flows

- Show the order in which tasks, events, and decisions happen.
- Every BPMN has them.
- In a diagram, they're shown as arrows:

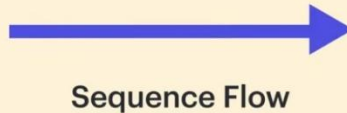

Figure 3 Sequence

2 roles of sequence flows:

1. Every BPMN must have 1 sequence flow.
2. Sequence flows always shows the direction of the process.

Activities

- Activities are the work you do in a process – actions that move it.
- Require effort from a person, a system, or another process.
- In a diagram, they're shown as rounded rectangles:

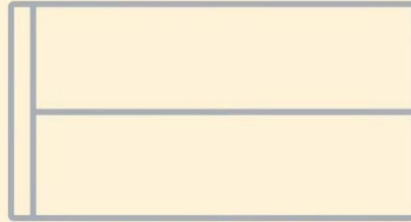

Figure 4 BPMN ACTIVITY

2 roles of activities:

1. Always represent the work that moves the process forward
2. Activities must be connected with the sequence flows

Pools and Swim lanes

- **Pool:** Represents the overall process you're modeling.
- **Swim lane:** Shows who or what is responsible for each step.
- Shown as large rectangles with small rectangles inside.

Pools and Swim lanes
