Summary

Currently studying a Master of IT in Software Engineering at Charles Darwin University, with experience in reporting and data analysis. Enjoy turning spreadsheet data into reports that help people understand what is happening in a business. Work with Power BI, Excel and SQL to check figures, build dashboards and explain findings in plain language.

Experience

Junior Reporting Analyst

Feb 2026 – Sep 2026

Northline Business Insights, Darwin

- Built Power BI dashboards for monthly sales reviews, helping the team compare revenue and profit across regions and see where performance had changed.
- Checked Excel and CSV files for missing or inconsistent values before using them in reports. Used SQL to check totals and DAX to calculate revenue, profit and margins.
- Wrote short notes explaining report figures and calculations so colleagues could follow the results. Helped publish reports and set up regular data refreshes.

Data & Documentation Intern

Aug 2024 – Jan 2025

Himalayan Analytics Studio, Nepal

- Organised day-to-day business records in Excel and used PivotTables and charts to turn them into clear summaries for regular reports.
- Kept meeting notes and wrote simple instructions for routine tasks. Updated reports after feedback and checked that the wording and formatting were consistent.

Technical Skills

- Power BI dashboard development
- SQL querying and data validation
- C# and Python programming
- Technical and business report writing
- Excel and Tableau visualisation
- Microsoft Fabric fundamentals
- ASP.NET MVC development
- GitHub version control

Project Experience

Retail Sales Reporting

2026

Software Engineering Practice, Charles Darwin University

- Used a retail sales dataset to build reports in Excel, Power BI and Tableau. Added revenue, cost and profit measures, with filters to explore results by date, region and product category.
- Loaded the data into Microsoft Fabric and used SQL to filter and summarise sales. Published the Power BI report online, connected the source file through a gateway and tested the refresh setup.

Education

Master of Information Technology

2025 – Present

Charles Darwin University, Darwin | Software Engineering

Bachelor of Business Information Systems

2020 – 2024

Kathmandu University, Nepal
